IDENTITY MANAGEMENT & COMPLIANCE

**AMAG**  
TECHNOLOGY  
A G4S COMPANY

**MITIGATE RISK**

**MEET COMPLIANCE**

**REDUCE COST**

**Symmetry™ CONNECT** is a policy-based identity management workflow platform that helps organizations streamline internal processes by mitigating risk, demonstrating compliance, and reducing operating costs. AMAG Technology understands that it's not just about the data and information you put into an application; it's what you can get out of it. Symmetry CONNECT provides end users with quick and easy access to all of their data on a single dashboard.

Organizations manage manual processes from human resources, IT, facilities, and physical security, who all interact yet have different policies, procedures and compliance challenges. They operate manual or spreadsheet based systems, but interact during onboarding, offboarding and audit processes. Symmetry CONNECT streamlines manual processes by connecting separate systems, eliminating security irregularities and enforcing company security policies to maintain compliance.

Reduce operating costs by streamlining on and off-boarding and card management

Enforce company policies generating a trackable, global compliance practice

Ensures approved identities have access to secure areas per company policies

Integrates with Symmetry Access Control and Picture Perfect to enforce compliance

**SYMMETRY CONNECT PROVIDES END USERS WITH QUICK AND EASY ACCESS TO ALL OF THEIR DATA ON AN IDENTITY DASHBOARD.**

Symmetry CONNECT automates cumbersome, manual access permission audits. Companies can schedule audits based on their needs and requirements, and automate the recertification process so they never fall out of compliance.

Correlate identities, behaviors and actions that exist in multiple databases via a simple dashboard

See threats that are missed when viewed in separate system silos

Big picture data helps identify security weaknesses

Extensive and customized reporting satisfies audit and compliance demands such as PCI, SOX, HIPAA, NERC CIP and many more
